

WebCTRL 5.2 Beginner Owner/Operator training

Who is this course for?

Persons interested in the basics of WebCTRL operation. No prior experience with the system is necessary.

Format

Instructor-led training with extensive hands-on exercises.

The class environment at Sunbelt Controls is relaxed: student participation is encouraged. Each student has their own workstation and modules to complete the course.

Length

3 days

Prerequisites

To profit from this course, you must have

- Windows XP or 7 experience
