

Retro-Commissioning Services

Decrease Your Environmental Footprint & Save Money!

Sunbelt Controls is an employee owned contractor with expertise in DDC design, installation, retrofit and maintenance.

With complete in-house engineering, installation, commissioning and service capabilities, Sunbelt Controls provides its customers with the most practical, cost-effective solutions for their particular mechanical and control system requirements.

Please contact us for more information about our Retro-Commissioning Services.

As your environmental conditioning partner, we understand the importance of reducing your energy costs, due to rising utility rates and decreasing environmental footprints to maintain sustainability. The challenge is in doing this while maintaining occupant comfort and lowering your capital and operating costs. Sunbelt Controls uses a systematic process for identifying less than optimal performance in existing buildings resulting in maximum energy efficiency and improved indoor air quality and comfort. Equipment and processes evaluated are typically in the following areas: DDC systems, lighting, air distribution systems, chilled and hot water systems.

Sunbelt Controls has the knowledge, resources, and experience to manage all aspects of your project, from the planning to implementation phase.

Sunbelt Controls can help you maintain your investment, whether you are considering:

- Commissioning
 - New Construction
 - Existing Buildings
 - Continuous
- Energy Star® Rating
- Utility Bill Analysis
- Load Shedding
- Energy Audits
- LEED® Certification
- Retrofits
- Auto Demand Response
- Renewable Energy
- Facility Audits
- Benchmarking
