

The leading full-service building automation contractor

About Sunbelt Controls

Sunbelt Controls is a leading full-service building automation contractor for new construction and retrofit projects in the Western United States. We provide complete, fully integrated, single source solutions ranging from engineering applications and automated control systems to design assistance, sustainable maintenance service and retro-commissioning.

Sunbelt Controls' model enables seamless cooperation with other operational and mechanical systems, leading to enhanced performance and increased efficiencies, with easy exchange of information. We deliver at a level above our competitors by offering expansive technical product knowledge, combined with intuitive Web-based automation solutions.

We believe that project management is the key to executing a successful building automation system implementation. Our project managers average 25 years of experience in the industry - in sales, operations and engineering - and are unique because they handle both the sale and implementation of a project.

The leading full-service building automation contractor

West Coast Authorized Dealer Standard Maintenance Scope

Sunbelt Controls service program addresses an extensive list of maintenance items for your automation system's software and hardware during each visit. Depending on the schedule that's right for you, each visit can include the following:

Enterprise Integration

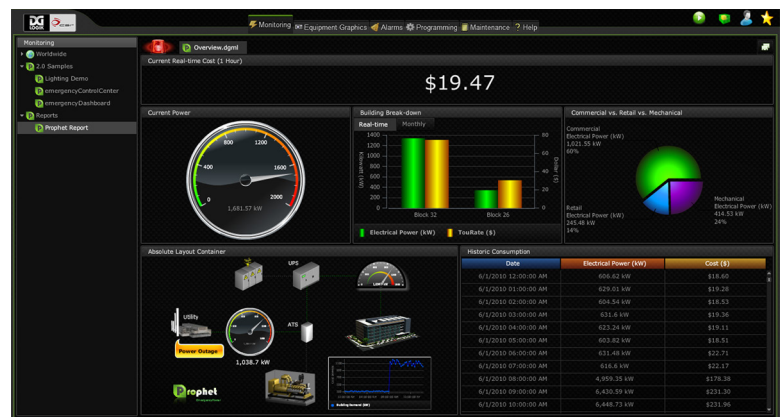

Sunbelt Controls, as a master integrator, offers a variety of services to accomplish an open building framework including, but not limited to, building automation system audit and integration, control system design and optimization, commissioning and retro-commissioning, and remote monitoring and diagnostics.

We work with you, from the beginning of a project to the end, in conjunction with the mechanical, electrical, and commissioning contractors, and through our user interface, we create an integrated cohesive unit, rather than separate facilities and systems.

We provide the following services:

- Building automation consulting
- System integration
- Energy data analysis tools & reports
- Design engineering/Dashboards
- Cost profiling (Steam, Water, Gas, Electrical, etc.)
- Controls commissioning agent services
- New construction turnkey installation
- 24hr, 365 days/year critical monitoring
- Routine maintenance
- HVAC/Controls relationship consulting
- Training

- System calibration and optimization
- Energy efficiency audit and tuning
- One-on-one customer training
- Preventative service
- Software and computer maintenance
- Review of alarms, set point deviations and mechanical operations
- Evaluation of utility rebate eligibility
- Comprehensive reporting and archiving
- System operator consultations
- On-the-spot operator training
