

Building Control Solutions for the Healthcare Industry

Sunbelt Controls has more than 30 years of experience in the design, construction and commissioning of innovative building automation systems, from the ground up. Our core strength is providing unmatched project management, engineering, programming and installation capabilities that result in a finished product that will have a positive impact on patient care and your bottom line.

Simple & Innovative Building Control Solutions

We provide complete, fully-integrated, single source solutions ranging from engineering applications and automated control systems, to design assistance, sustainable maintenance service, retro-commissioning and energy rebate supported projects. In addition, we are specialists in building automation system retrofit and integration.

The Sunbelt Controls Advantage

Our operations include offices in Azusa, Costa Mesa, Las Vegas, Pleasanton, Sacramento, San Bernardino, San Diego, San Francisco, Seattle, and Texas. Sunbelt Controls provides system integration and expansion capabilities across all healthcare facilities - including MOB, Research Facilities, and Critical Care Hospitals.

Further, we are well versed and up-to-date in regulatory agency compliance support, monitoring, and OSHPD specifications.

We're proud to offer a comprehensive range of healthcare facility service capabilities - including gas consumption monitoring, pressure monitoring, and energy usage.

Cedars-Sinai Medical Center - Los Angeles, CA

Energy Efficiency

Sunbelt Controls understands the need to protect our environment through conservative use of energy. Our LEED-certified Project Managers, Engineers and Certified Technicians strive to maximize building performance and reduce energy consumption. This can be done with the current system through retro-commissioning or by implementing a new Energy Efficient system.

Currently, Automated Logic has developed new tools to assist the owners to better understand their building's performance. The Environmental Index and Energy Reports take complicated building control information and make it easy to use and analyze to help you make smart decisions. Our operating dashboard allows a quick comparison of comfort and energy consumption in one view.

24/7/365 Service

Our service program addresses an extensive list of healthcare-specific maintenance items for your automation system's software and hardware during each visit. At any time of the day or night, our dedicated team will answer your call and put you in touch with a trained service technician who can solve issues remotely or, if necessary, on site within 4 hours.

System Maintenance
Remote Building Management
Retro & Continuous Commissioning
Energy Usage

Our Service Department stands ready to answer the call 24 hours a day, 7 days a week.

Services Provided

- Isolation room systems for infectious disease control and monitoring
- Patient room air quality monitoring in line with Dept. of Health requirements
- FDA validated cleanroom solutions
- Neonatal/ICU/OR systems
- Dashboard analytics
- Medical gas monitoring
- Emergency generator and critical life safety system monitoring
- Products meet OSHPD and CA seismic requirements
