

FACTORY CERTIFIED TRAINING COURSES

Available Training Courses:

- WebCTRL Basic (WC-206.5)
- WebCTRL Intermediate (WC-306.5)
- Field Tech for Owner/Operators (FTO-206.5)
- Eikon Basic (EIK-206.5)
- Eikon Intermediate (EIK-306.5)
- Networking Basic (NET-206.5)
- Networking Intermediate (NET-306.5)
- ViewBuilder Basic (VB-206.5)

OWNER/OPERATOR • FIELD TECHNICIAN • DESIGN ENGINEER

FACTORY CERTIFIED TRAINING COURSES

MEET OUR INSTRUCTORS

Kirk Strobel

Kirk Strobel is a Factory Certified trainer for ALC. He has a bachelor's Degree in Business Management / Computer Science. Kirk has over 17 years experience designing and implementing Building Management systems. Kirk has been an Instructor/Manager at Sunbelt controls for over 8 years operating out of the Sunbelt Azusa branch.

Derick Hopkins

Derick Hopkins is a Factory Certified trainer for ALC. He has over 18 years of field experience in Service, Start-up and controls. Derick has served as a Construction Supervisor and has been an Instructor/Manager at Sunbelt controls for over 4 years operating out of the Sunbelt Pleasanton branch.

BAS University

Our instructors are affiliated with the BAS University program

Sunbelt Controls utilizes Automated Logic Corporation's (ALC) factory approved software, hardware and materials.

We can teach the same level of certified classes at your facility.

Training Locations:
Pleasanton, Sacramento, Azusa, San Diego and Las Vegas

Owner/Operator Training Track:

You have invested in your WebCTRL system. Invest in the education and efficiency of your employees. Earn a certificate for each class as well as for each training track

Associate 0 to 6 months WebCTRL experience
WC-206 – WebCTRL Basic

Practitioner 6 months to 1+ years WebCTRL experience
FTO-206 – Field Tech for Owner/Operators
WC-306 – WebCTRL Intermediate

Master 1+ years WebCTRL experience
EIK-206 – Eikon Basic
NET-206 – Networking Basic
VB-206 – ViewBuilder Basic

8 FACTORY CERTIFIED TRAINING COURSES

WebCTRL Basic (WC-206.5) – 2 days

For Owner/Operators new to WebCTRL

- View and navigate the system interface
- Create schedules and schedule groups
- Set up trends and create trend graphs
- Run and save reports
- Better understand alarm management
- Read and edit logic pages

WebCTRL Intermediate (WC-306.5) – 3 days

For Intermediate Owner/Operators

- Navigate the complete WebCTRL interface
- Better understand system architectures
- Track down and investigate alarms at all levels
- Create custom reports
- Utilize factory supported Add-Ons
- Reverse engineer and troubleshoot logic pages.

Field Tech for Owner/Operators (FTO-206.5) – 3 days

For Intermediate Owner/Operators

- Start-up a basic Automated Logic WebCTRL system
- Perform basic system and network troubleshooting
- Use the following WebCTRL applications:

WebCTRL
Eikon – LogicBuilder
ViewBuilder
SiteBuilder
EquipmentBuilder

ViewBuilder Basic (VB-206.5) – 2 days

For Owner/Operators new to ViewBuilder

Upon completion of this course, you will be able to:

- Explore the symbol library
- Recognize microblock paths
- Attach .view files to equipment
- Attach floorplan .view files to areas
- Program floorplan and thermographic summary pages
- Use EquipmentBuilder to make .view files

Eikon Basic (EIK-206.5) – 2 days

For Owner/Operators and Technicians new to Eikon LogicBuilder.

Quickly and efficiently:

- Describe the different types of microblocks
- Read a sequence of operations and translate it to a program
- Simulate a program to find errors

Eikon Intermediate (EIK-306.5) – 3 days

For Intermediate Owner/Operators and technicians who must make elegant programs from scratch.

- Use programming and naming standards
- Create a symbol library
- Use Eikon productivity tools
- Build a properties page
- Make major edits to an existing control program
- Create an advanced control program with a custom sequence of operations

Networking Basic (NET-206.5) – 2 days

For Owner/Operators and Technicians with little to no experience with IP, ARC156, or MS/TP networks.

You will be able to properly set up and troubleshoot ALC networks.

- IP Basics
- ARC156 Basics
- MS/TP Basics
- SiteBuilder
- Wireshark Captures
- BACnet Discovery

Networking Intermediate (NET-306.5) – 3 days

For Owner/Operators and Technicians needing to design complex network systems.

Focused on troubleshooting networks by reading Wireshark capture.

- BACnet bindings
- Wireshark
- Network Microblocks
- Subnet Masks
- Nat Routers / Firewalls
- Hierarchical Servers
- Security
